

PROFILE

Design engineer with eight years turning ambiguous problems into measurable product outcomes. Ships the interface, the pipeline behind it, and the motion that makes both feel inevitable — with a designer’s eye for the last 5%.

EXPERIENCE

- Senior Full-Stack Engineer — Northbeam

2022 — Present

—Own checkout & billing end-to-end; rearchitected it onto an edge-rendered stack.

—Led the 12-person Design Engineering guild — built the motion & a11y standards handbook.

—Co-founded the AI copilot program: “Explain this charge” reached 61% of active accounts.
- Product Engineer — Lumen Health

2019 — 2022

—Led a 6-person squad rebuilding the patient portal; engagement up 54% within two quarters.

—Shipped the HIPAA-compliant video visit flow used by 240+ clinics.

—Drove the accessibility audit that earned WCAG 2.1 AA certification for the suite.
- Frontend Engineer — Pixelform

2017 — 2019

—Cut the flagship app’s bundle size by 41% via code-splitting and a token-driven theming engine.

—Built the in-house charting library that three client products shipped on.

—Reduced cross-team review cycles 2.4× by introducing a motion review checklist.

SELECTED WORK

Pulse	— AI-powered fintech dashboard ·	+37% activation, −42% support tickets, 1.2s TTI
Aurora	— Headless D2C storefront ·	0.9s LCP, +23% conversion, +18% AOV
Terra	— Climate-intelligence 3D globe ·	1.4M tiles/day, −63% latency
Muse	— Open-source design & motion system ·	96% reuse across 12 teams

EDUCATION

- B.Tech, Computer Science — VIT Vellore

2013 — 2017

—Graduated with an 8.6 CGPA; thesis on gaze-aware interface adaptation (published).

—Founded the design club and ran the campus hackathon for two consecutive years.

SKILLS

Engineering: TypeScript · Next.js · React · Node · Postgres · Redis · Three.js / R3F · WebGL shaders · d3

Craft: Design tokens · motion systems · WCAG 2.2 · product strategy · leadership
